**DOUBLE COATED KEDER**

Double Coated Keder is manufactured by wrapping a regular coated fabric around an extruded core, then adding a layer of traditional keder fabric on top of it, but without covering the flag.

**Benefits:**

- higher resistance against wear: 4 layers in the weld area
- flag is coated, so it stays clean and can be welded on
- resistance against UV for long term projects
- easy to repair or replace when damaged

**Other sizes available – please contact us**

- Diameters 6mm, through 15mm
- Colors: white, silvergrey, black standard - any fabric as custom production
- White can be opaque and translucent
- Weld size and Flag size customizable
- Repair keder
- Cut to length
